

Multifunctional and usable all year round

- ➡ PLAY, ENJOY
- + PRACTICE

### Play and enjoy... outdoor sports all year round whatever the weather

### **ECONOMICAL**

A fraction of the investment of a conventional sports hall, with minimal operational costs.

### SAFE

SMC2's solutions comply with all relevant American and Canadian Building Codes.

- Designed and classed as permanent structures.
- Manufacturer-backed 22 year warranty on roof membrane.

### **SUSTAINABLE**

SMC2 has studied the environmental impact of PREO(r) to minimize its impact by using materials with low ecological footprint: recyclable steel, wood from sustainably managed forests, 100% recyclable textile membrane, etc.

onnex (France) - Covered multisports ground

### **RAPID BUILD**

Quick and clean erection with dry construction processes. No need for mass concrete foundations. Assembly on-site of the pre-engineered and pre-fabricated components in under 1 month.

### Temperate environment

The textile membrane fulfils a shielding function: it protects users from inclement weather, UV rays and overheating in summer.

No need for artifical lighting during the day. Natural light is homogeneously distributed beneath the translucent membrane, avoiding glare.

## **س**))

### Controlled acoustics

The flexibility, shape and acoustic properties of the membrane minimizes reverberation and echo, providing optimal acoustics.

## **A TAILOR MADE FACILITY**

Whether covering an existing sports area or building a brand-new structure, the solutions provided by SMC2 adapt to all dimensions.

### **1** DESIGN YOUR HALL

• Structure made of glulam timber and hot-dip galvanised steel

### **3 CHOOSE YOUR SPORT SURFACING**

Artificial Turf - Outdoor EPDM surface - Asphalt

federations regulations.
